DETAILED ACTION

This office action is in response to application 10/668,684 and preliminary amendment filed on 02/20/2004. Claims 1-17 are pending in this application.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to process for designing a semi-conductor memory DRAM, classified in class 716, subclass 8.
- II. Claims 16-67, drawn to a process for manufacturing a semi-conductor memory DRAM, classified in class 700, subclass 121.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the semi-conductor memory DRAM of invention Group II can be made using other process of designing than that of invention Group I.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
